

QUALITATIVE USABILITY TESTING CONCLUSIONS

- Less clicks to get what you want would help the website
- The phone number should be taken out of the contact us button
- Would prefer for the donate button to be in all pages rather than the donate button
- Would be nice to use an anchor that takes you to different locations on the website
- Would be nice to use an accordion to prepare the “about” information
- More colors
- Font style and color can be changed to show professionalism and enhance ease of viewing.
- Too much scrolling
- An arrow can be used to make it clearer that the photos and the reviews can be dragged to the left to see more.
- Volunteer page is ambiguous and does not provide clear information about where volunteers can help
- Volunteer and events can be separated.
- Sponsors could be on “About us” page
- It would be better to use symbols, charts, and pictures to explain what they do than loads of text.
- Left aligned text is more inviting than centered text.
- Anchor tags would be wiser to use for the major sponsors
- You might consider prioritizing Andrew’s (their son) story as it is a huge part of their organization
- Would be wise to have all the board of directors seen at a glance
- It would be wise to have all the sponsors seen at a glance. Too much scrolling can be tiring for everybody.
- Logo is too stretched out. Should be the exact size
- Puzzles and rubics cube are nice
- “More info” buttons are self-explanatory
- Too much space surrounding headers on each page
- Everyone loves “reviews”

QUANTITATIVE USABILITY TESTING CONCLUSIONS

	TIM	ANGELA	USER1	USER2	USER3	TOTAL
UNDERSTANDING SIGNIFIERS	4	3	4	3	3	17
FINDS “CONTACT US” BUTTON	5	3	5	5	4	22
FINDS HOW TO VOLUNTEER	4	3	4	4	3	18
FINDS HOW TO DONATE	5	5	5	5	5	25
UNDERSTOOD REACH AUTISM POST USAGE	2	4	2	1	2	11
KNEW TO DRAG THROUGH PHOTOS	3	2	1	2	0	8
WHAT WAS USED FOR PAGE NAVIGATION	SIGNIFIERS	SIGNIFIERS	HEADER	SIGNIFIERS	HEADER	SIGNIFIERS
READ WHILE SCROLLING?	0	0	0	0	1	1
FOUND “GALLERY”	0	1	2	0	0	3
FOUND “SEND US A MESSAGE”	0	1	3	0	0	4

Note: Each task is rated on a scale of 1-5. 0 being completely that users did not meet expectations and 5 being that users met expectations and at an appropriate time.

CONCLUSIONS FROM QUANTITATIVE TEST

CRUCIAL (1 – 15)

1. 1/5 users read while scrolling and did not read in detail. (1/25)
2. 2/5 users found the gallery page but not quick enough. (3/25)
3. 2/5 users found the “send us a message” page but not quick enough. (4/25)
4. 4/5 users knew to drag through the reviews and pictures but after a while. (8/25)
5. Users barely had enough information about the services Reach autism offers post website usage. (11/25)

OTHERS (16 – 25)

1. Signifiers were reasonably understood. Users used them to navigate through the website more than the header. (17/25)
2. Users found out what to do if they wanted to volunteer. (18/25)
3. User found out how to donate at the expected at the expected time (22/25)
4. Users found contact us button very easily. (25/25)

	Feature							
	Contact us	Donate	Font	About us page	Sponsors page	Volunteer/ Events page	Logo	Text
What	1. Removing phone number from contact us button	Replace Contact us button with a donate button	Change font style and color to something easier to see.	1. Make use of accordion to display lengthy information. 2. Make use of symbols and picture to do more of the communication 3. Display board of directors in a grid	Combine all sponsors to one page	1.Split this page into two	1. Change logo background to align with appropriate color. 2. Fix overstretched logo	Text should be left aligned instead of center aligned
How	Take off the phone number	Change "contact" to "donate" on each page, and it should follow user as they're scrolling.	Use Figma to alter the font style and color to appropriate	1. Use a '+' and '-' to give the user the option to see more information with an accordion showing a drop down. 2. Use charts to summarize what reach autism does for the users who would not click '+' 3. Align board of directors in a grid format	Add all the sponsor information on a page with the three major sponsors at the top of the page and the value fundraiser in grid format.	Dedicate an entire page to volunteer and events with a volunteer page clearly indicating what specific work volunteers can do and process towards being a volunteer.	1. Blend color of logo to rhyme with what's behind. 2. Make the logo the appropriate size.	Change alignment of text
Why	This would prevent editing the phone number each time Reach autism changes their phone number.	Client would prefer for that to be the easily assessable button as it's important to the organization	This would help with easy reading of information on the website	This prevents an overwhelming website with so much information that requires tedious scrolling. It should be a choice to see a lot of information. Charts and pictures would do a better job communicating	This prevents tedious scrolling.	Some users or customers might want to come to the events for visitation and not to volunteer so it's only logical to give them separate pages	This would give the website a better look.	Left aligned texts are easier to read.
